DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Species 1 (figure 5) in the reply filed on August 24, 2006 is acknowledged. The traversal is on the ground(s) that the restriction requirement is unclear. This is not found persuasive because applicant appears to be arguing features that were not subject to the restriction requirement. The restriction was directed to the structure of the cup, as shown in figure 5 as a single piece, figure 10 as two pieces and figure 11 as three pieces. Figures 5, 10 and 11 show the respective species of cups using identical perspectives. The examiner finds the Office Action sufficiently clear in regard to the subject matter being restricted. The locking ring included in figure 7 is also shown in figure 10, however no mention was made of the locking ring in the original requirement because the ring is present in multiple species, an election of a single species of cup would limit the locking ring for examination purposes as well.

The requirement is still deemed proper and is therefore made FINAL.

2. This application contains claims directed to the following patentably distinct species:

Species 1: the invention wherein each ring is attached to its outer race with a weld. (claim 13)

Species 2: the invention wherein each ring is attached to its outer race with a weld. (claim 14)

Species 3: the invention wherein each ring is attached to its outer race with a weld. (claim 15)

3. The species are independent or distinct because the devices would contain a materially different structure based on the differing means of attachment.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently Claims 1, 3-10 and 16-23 appear to be generic.

4. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper. A text search of one species would not encompass the field of search for the other species.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
